13 1. Is it correct? 2. How much time does it  
take, as a function of  $n$ ? 3. And can we do  
better? The first question is moot here, as  
this algorithm is precisely Fibonacci's  
denition of  $F_n$ . But the second demands an  
answer. Let  $T(n)$  be the number of computer  
steps needed to  $n$ .,. And 01

Vazirani is the GOAT. This book reads like  
him whispering sultrily into your ear. It's  
actually a joy to read and doesn't "feel like  
a textbook." The book is surprisingly slim,  
and the chapters feel just as long as they  
need to be. He taught my Algorithms class,  
and a number of of our homework problems came  
from the exercises in this book.

In addition to the text, DasGupta also offers  
a Solutions Manual, which is available on the  
Online Learning Center. "Algorithms is an  
outstanding undergraduate text, equally  
informed by the historical roots and  
contemporary applications of its subject.  
Like a captivating novel, it is a joy to  
read."
