Dynamics of the Singapore Success Story-Zhibin Zhang 2011 Based on his rich, forty-year experience as a senior Singapore civil servant, Ngiam Tong Dow manages to present a clear picture in this book of Singapore's path toward success. It is a collection of his speeches, interviews, and articles delivered and written between 2004 and 2010.

Based on his rich, forty-year experience as a senior Singapore civil servant, Ngiam Tong Dow manages to present a clear picture in this book of Singapore's path toward success. It is a collection of his speeches, interviews, and articles delivered and written between 2004 and 2010. According to Ngiam, what lies behind Singapore's spectacular achievements from 1959 onward is the island nation's relentless pursuit of knowledge as the critical lever for development. Singapore is the forerunner of knowledge-based economies emerging in this new millennium.

Focusing on issues in the management and governance of IT innovation, this book links concepts and theories of academic learning to actual real-life scenarios from the successful experiences of public and private sector organisations in Singapore. While there is little disagreement that innovation is the fundamental source of value creation and competitive advantage, investment in IT to support and foster innovation by no means guarantees success. There are various issues to be considered, such as the question of processes and structures that need to be in place in order to maximise value, how to leverage IT innovation to formulate constantly evolving strategies so as to seize emergent opportunities, and how to overcome challenges faced in implementation, amongst others. Suitable as a complement to main texts for academic courses on accounting information systems and management information systems, as well as a guide for business professionals in this field, the book provides a concise introduction on the subject through the use of case studies and teaching notes, affording a broad perspective on the most important issues.

Focusing on issues in the management and governance of IT innovation, this book links concepts and theories of academic learning to actual real-life scenarios from the successful experiences of public and private sector organisations in Singapore. Contents:The Evolution of Singapore's Infocomm Plans: Singapore's E-Government Journey from 1980 to 2007 (Barney Tan, Pan Shan Ling and Virginia Cha)Singapore E-Government Initiatives: Engaging Users (Calvin Chan and Pan Shan Ling)Developing a Customer-Centric, Inclusive E-Government: Lessons from the Central Provident Fund Board of Singapore (Barney Tan, Pan Shan Ling and Virginia Cha)Constructing a Platform for Information Technology Value Co-Creation: Lessons from the Alliance for Corporate Excellence Programme (ACE) of Singapore's Ministry of Finance (Barney Tan)Accounting and Corporate Regulatory Authority's BizFile System (Calvin Chan)Achieving and Enhancing E-Government Integration: Lessons from the Land Data Hub Project of the Singapore Land Authority (Barney Tan and Pan Shan Ling)NS Portal: Transforming the Public Services of the Ministry of Defence of Singapore (Barney Tan)Capability Deployment in Crisis Response to Asian Tsunami Disaster (Gary Pan)Facilitating Feature-Function Stakeholder Fit in Enterprise System Implementation: Lessons from Republic Polytechnic (S Sathish)LTA's ONE.MOTORING Portal (Calvin Chan and Mahdieh Taher)IT Implementation: Lessons from Grand Mercure Roxy Hotel (Sitoh Mun Kiat and Pan Shan Ling)IT in Supply Chain Management: Batamindo Shipping & Warehouse Pte Ltd (Leong Mei Ling and Pan Shan Ling)Healthway Medical Group's Clinical Management System (Anand Ramchand and Leong Mei Ling) Readership: Final year undergraduate and graduate students in accountancy, information systems, business administration; IT consultants, business managers and information systems managers. Keywords:Governance;IT Innovation;Singapore;Case StudyKey Features:Case studies of successes in using IT for innovation by private and public sector organisations in SingaporeAccessible for students and trade professionals, unlike most books on the topic which focus on e-gov or are pitched at research level

Singapore gained independence in 1965, a city-state in a world of nation-states. Yet its long and complex history reaches much farther back. Blending modernity and tradition, ideologies and ethnicities, a peculiar set of factors make Singapore what it is today. In this thematic study of the island nation, Michael D. Barr proposes a new approach to understand this development. From the pre-colonial period through to the modern day, he traces the idea, the politics and the geography of Singapore over five centuries of rich history. In doing so he rejects the official narrative of the so-called 'Singapore Story'. Drawing on in-depth archival work and oral histories, Singapore: A Modern History is a work both for students of the country's history and politics, but also for any reader seeking to engage with this enigmatic and vastly successful nation.

A major new volume in the Routledge International Handbooks series analysing emerging and newly emerged economies, including the BRICS countries (Brazil, Russia, India, China and South Africa) and other likely (Turkey, Indonesia, Mexico, and South Korea) as well as possible (Vietnam, The Philippines, Nigeria, Pakistan, Egypt, Colombia and Argentina) candidates for emerging economy status. Chapters on theories surrounding emerging markets (including the Beijing/Washington Consensus debate) offer an overview of current issues in development economics, in addition to providing an integrated framework for the country case studies. Written by experts, this handbook will be invaluable to academics and students of economics and emerging economies, as well as to business people and researchers seeking information on economic development and the accelerating pace of globalization.

Rev. ed. of: Management of success, the moulding of modern Singapore.

Business, Government and Labor in the Economic Development of Singapore and Southeast Asia analyzes the inter-linked and evolving roles of private sector business, government public policy, and labor markets in the economic development of Singapore and its Southeast Asian neighborhood. It does this through 16 essays written by Prof. Linda Y C Lim, an early and long-established scholar of these subjects, and published over a 35-year period. For Singapore, often considered the world's most successful economy, the essays highlight the determining role of government's industrial and social policy through to the present day, when the growth model of the past faces many external market and domestic resource constraints. In the rest of Southeast Asia, in contrast, the essays explore how private sector business, dominated by the locally-domiciled ethnic Chinese minority, thrived and drove economic growth in underdeveloped markets with imperfect institutions, and consider if and how this might change with China's increasing presence in the regional economy. A final set of essays analyzes the forces underlying women's employment, from labor-intensive Southeast Asian export factories in the 1980s to Singapore's foreign-labor-dependent economy and its current productivity challenges. Taken together, the essays show how government, business and labor interact in the process of economic development.

Although Chinese economic growth continues strong, and although China coped very well with the recent global crisis, the Chinese economy faces many challenges, including how to sustain growth, how to rebalance the economy towards more domestic consumption, how to accommodate rising wages, growing social and regional inequality, and how to reform financial and monetary policies. This book examines the key challenges currently facing the Chinese economy. It considers Chinas' increasing global impact, discusses the institutional drivers of China's economic growth, assesses critically China's need for structural reform, and explores issues related to sustainability and human rights.

These papers discuss some of the major aspects of decentralization and urban change in the context of globalization.
