We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Constantine, surnamed "the Great" was one of the greatest emperors of the Roman Empire, one of the greatest Illyrians who ever lived. He was the oldest son of Emperor Constantius Chlorus and was born in 272 at Naissus of Moesia in eastern Illyricum. He fought beside his father who was killed at the fatal battle of York. Constantine became a Caesar (306) then an Augustus (308). It was on his way to the crucial battle of Rome's Milvian Bridge that he saw a vision of a luminous cross in the sky and the words "There's Victory in This Sign", from which he dated his conversion to Christianity in 312. Fighting against the one remaining emperor, Licinius, he gained control of Illyricum, Macedonia, and Achaia (314). In 324, he remained the sole emperor of the Roman Empire. Early in his career, he issued his famous Edict to stop the persecution of Christians initially and then to favour Christianity. In 325, he convened the Christian Council of Nicea attended by a great number of bishops of the Roman Empire. Possibly to symbolize his break with Rome's pagan past, Constantine left Rome in 326. He removed the seat of Empire to Byzantium which he renamed Constantinople after himself, dedicating it in 330s. In his new organization of the empire, Illyricum formed one of the great provinces. Constantine was baptized by the church historian Eusebius shortly before his death in 337. His three sons Constantine, Constantius, and Constans succeeded their father, the latter inheriting Illyricum, Italy, and Africa.

Offers students a comprehensive one-volume survey of this pivotal emperor and his times.

Constantine is a convenient and concise account of one of the most important figures in ancient history. Hans Pohlsander: * describes the Roman world into which Constantine was born * assesses Constantine's ability as soldier and statesman * emphasizes the significance of Constantine as Rome's first Christian emperor * discusses the importance of the establishment of the new capital at Byzantium * gives an even-handed assessment of Constantine's achievement * incorporates a cultural and artistic focus, analyzing coins, architecture, sculpture and painting of the period.

#1 NEW YORK TIMES BESTSELLER □ A bold work from the author of *The Black Swan* that challenges many of our long-held beliefs about risk and reward, politics and religion, finance and personal responsibility In his most provocative and practical book yet, one of the foremost thinkers of our time redefines what it means to understand the world, succeed in a profession, contribute to a fair and just society, detect nonsense, and influence others. Citing examples ranging from Hammurabi to Seneca, Antaeus the Giant to Donald Trump, Nassim Nicholas Taleb shows how the willingness to accept one's own risks is an essential attribute of heroes, saints, and flourishing people in all walks of life. As always both accessible and iconoclastic, Taleb challenges long-held beliefs about the values of those who spearhead military interventions, make financial investments, and propagate religious faiths. Among his insights: □ For social justice, focus on symmetry and risk sharing. You cannot make profits and transfer the risks to others, as bankers and large corporations do. You cannot get rich without owning your own risk and paying for your own losses. Forcing skin in the game corrects this asymmetry better than thousands of laws and regulations. □ Ethical rules aren't universal. You're part of a group larger than you, but it's still smaller than humanity in general. □ Minorities, not majorities, run the world. The world is not run by consensus but by stubborn minorities imposing their tastes and ethics on others. □ You can be an intellectual yet still be an idiot. "Educated philistines" have been wrong on everything from Stalinism to Iraq to low-carb diets. □ Beware of complicated solutions (that someone was paid to find). A simple barbell can build muscle better than expensive new machines. □ True religion is commitment, not just faith. How much you believe in something is manifested only by what you're willing to risk for it. The phrase "skin in the game" is

one we have often heard but rarely stopped to truly dissect. It is the backbone of risk management, but it's also an astonishingly rich worldview that, as Taleb shows in this book, applies to all aspects of our lives. As Taleb says, "The symmetry of skin in the game is a simple rule that's necessary for fairness and justice, and the ultimate BS-buster," and "Never trust anyone who doesn't have skin in the game. Without it, fools and crooks will benefit, and their mistakes will never come back to haunt them."

The landmark five-book series--all together in one boxed set *The Incerto* is an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision making when we don't understand the world, expressed in the form of a personal essay with autobiographical sections, stories, parables, and philosophical, historical, and scientific discussions, in non-overlapping volumes that can be accessed in any order. The main thread is that while there is inordinate uncertainty about what is going on, there is great certainty as to what one should do about it. This boxed set includes: *FOOLED BY RANDOMNESS* *THE BLACK SWAN* *THE BED OF PROCRUSTES* *ANTIFRAGILE* *SKIN IN THE GAME*
