Ford ranger 2.5 diesel engine wl type torque settings big...

There are two major kinds of starting problems with a Ford Ranger: it won't crank, or it won't start. If it won't start, the possible problems are a failed fuel pump or a failed crank position sensor. If it won't crank, the issues could be a failed starter motor, a failed neutral safety switch, a failed ignition or a locked-up engine.

How Can You Troubleshoot Starting Problems on a Ford Ranger?
