Host Access Class Library - IBM - United States

Introduction IBM Personal Communications provides an emulator interface to communicate with IBM Mainframe/AS400/VT sessions. This is used for reading & updating host data and interfacing host with other applications. Performing manual tasks on emulator screen increases in transaction and becomes repetitive, this over a long term would have issues:

IBM PCOMM 12.0 now seamlessly supports file transfer to MVS file systems, apart from existing support for hierarchical file systems (HFS). Note: File transfer to an MVS file system might result in change to the file name as per MVS naming conventions. This is applicable to both MVS sequential data set (also called physical sequential/PS) and MVS partitioned data set (PDS). Serviceability
