Due to the variety of specimens submitted to the bacteriology laboratory, many of the steps related to the processing and workup of a specimen have remained manual.

### **Clinical Bacteriology - an overview | ScienceDirect Topics**

Bacteriology is a branch of microbiology that is concerned with the study of bacteria (as well as Archaea) and related aspects. It's a field in which bacteriologists study and learn more about the various characteristics (structure, genetics, biochemistry and ecology etc) of bacteria as well as the mechanism through which they cause diseases in humans and animals.
