Whereas the original Sequel featured first-order crossover slopes, with the out-of-band rejection steepening to 12dB/octave, well away from the actual crossover frequency, the II's crossover is a symmetrical, second-order, 12dB/octave type. It is mounted on a printed circuit board carried on a metal tray that sits on top of the woofer enclosure.

I've had Logan Quests and the Aeries back in the mid 90's, which is around when the Sequel came out. The production run for Sequel II's was from 1995 to 99 I think. Beautiful speaker, very involving, also great for HT as long as you recognize some limitations in the deep bass and also a little in dynamics.
