This updated and expanded version of the very successful first edition offers new chapters on controlling the emission from electronic systems, especially digital systems, and on low-cost techniques for providing electromagnetic compatibility (EMC) for consumer products sold in a competitive market. There is also a new chapter on the susceptibility of electronic systems to electrostatic discharge. There is more material on FCC regulations, digital circuit noise and layout, and digital circuit radiation. Virtually all the material in the first edition has been retained. Contains a new appendix on FCC EMC test procedures.

What do you do when desire drives you to the very brink? Someone wants the Native Americans off their sacred land. And when Navajo journalist Katherine James and park ranger Gabriel Rossiter team up to investigate why, their passion for the truth-and each other-makes them targets for those desperate enough to kill.
