The 13th edition places a particular focus on students, giving them step-by-step help as they learn the elements of music, an increased number of musical selections to experience, and an enhanced Connect and SmartBook experience"--

In this book, readers will learn practical tips and strategies to teach music appreciation online. As online education is a growing field, an increasing number of teachers trained in traditional/live methods find themselves now teaching online and potentially without mentors to assist them. Students are also changing, seeking highly engaged, relevant, and interactive learning opportunities that connect to their lives. Here, readers will find helpful guidance in planning curriculum, integrating multimedia assets, designing forum discussions, developing assignments, preparing rubrics, engaging in forum discussions, preparing, managing, and teaching, the course, providing feedback and grading, and following up with struggling and challenging students. The book can serve as a resource to those already teaching music appreciation online or as a comprehensive guide to those new to the field. Additionally, it may serve as a resource to instructors in other disciplines who seek to shift live-courses to the online format, as well as music appreciation instructors who would like to integrate digital or online components into traditional face-to-face courses. The book is organized into five major sections, designed to guide the novice online educator in depth while also appealing to the seasoned veteran through the ability to review each section as a stand-alone resource. Although some readers will desire to read from cover to cover, they will also be able to move in a non-linear manner from chapter to chapter, using chapters in modular form, in order to benefit from the sections that most apply to them at any given time.

Music moves through time; it is not static. In order to appreciate music we must remember what sounds happened, and anticipate what sounds might come next. This book takes you on a journey of music from past to present, from the Middle Ages to the Baroque Period to the 20th century and beyond!

Now in trade paperback: "The definitive guide to musical enjoyment" (Forum). In this fascinating analysis of how to listen to both contemporary and classical music analytically, eminent American composer Aaron Copland offers provocative suggestions that will bring readers a deeper appreciation of the most viscerally rewarding of all art forms.

With a lifetime of experience, profound knowledge and understanding, and heartwarming appreciation, an internationally celebrated conductor and teacher answers the questions: Why should I listen to classical music? How can I get the most from the listening experience? A protégé of Leonard Bernstein--his colleague for eighteen years--and an eminent conductor who has toured and recorded all over the world, John Mauceri helps us to reap the joys and pleasures classical music has to offer. Briefly, we learn the way a musical tradition born in ancient Greece, embraced by the Roman Empire, and subsequently nurtured by influences from across the globe, gave shape to the classical music that came to be embraced by cultures from Japan to Bolivia.

Then Mauceri examines the music itself, helping us understand what it is we hear when we listen to classical music: how, by a kind of sonic metaphor, it expresses the deepest recesses of human feeling and emotion; how each piece bears the traces of its history; how the concert experience--a unique one each and every time--allows us to discover music anew. Unpretentious, graceful, instructive, this is a book for the aficionado, the novice, and anyone looking to have the love of music fired within them.

NEW YORK TIMES BESTSELLER • A beautifully written, witty memoir that is also an immersive exploration of classical music—its power, its meanings, and what it can teach us about ourselves—from the MacArthur “Genius” Grant–winning pianist “Jeremy Denk has written a love letter to the music, and especially to the music teachers, in his life.”—Conrad Tao, pianist and composer In *Every Good Boy Does Fine*, renowned pianist Jeremy Denk traces an implausible journey. His life is already a little tough as a precocious, temperamental six-year-old piano prodigy in New Jersey, and then a family meltdown forces a move to New Mexico. There, Denk must please a new taskmaster, an embittered but devoted professor, while navigating junior high school. At sixteen he escapes to college in Ohio, only to encounter a bewildering new cast of music teachers, both kind and cruel. After many humiliations and a few triumphs, he ultimately finds his way as a world-touring pianist, a MacArthur “Genius,” and a frequent performer at Carnegie Hall. Many classical music memoirs focus on famous musicians and professional accomplishments, but this book focuses on the everyday: neighborhood teacher, high school orchestra, local conductor. There are few writers capable of so deeply illuminating the trials of artistic practice—hours of daily repetition, mystifying advice, pressure from parents and teachers. But under all this struggle is a love letter to the act of teaching. In lively, endlessly imaginative prose, Denk dives deeply into the pieces and composers that have shaped him—Bach, Mozart, and Brahms, among others—and offers lessons on melody, harmony, and rhythm. How do melodies work? Why is harmony such a mystery to most people? Why are teachers so obsessed with the metronome? In *Every Good Boy Does Fine*, Denk shares the most meaningful lessons of his life, and tries to repay a debt to his teachers. He also reminds us that we must never stop asking questions about music and its purposes: consolation, an armor against disillusionment, pure pleasure, a diversion, a refuge, and a vehicle for empathy.

What does it take to make a great performance? It takes great music, a great performer and a great instrument. *Music: An Appreciation* includes some of the greatest music ever created. Roger Kamien’s excellence as an interpreter of that music has made his program number one in the market used by over half a million students since its conception. Now, **CONNECT** Kamien provides the world-class instrument that allows *Music: An Appreciation* to bring great music to his audience in an extraordinary new way. *Music: An Appreciation* is great music, a great interpreter, and a great instrument.

Music and the Brain: Studies in the Neurology of Music is a collaborative work that discusses musical perception in the context of medical science. The book is comprised of 24 chapters that are organized into two parts. The first part of the text details the various aspects of nervous function involved in musical activity, which include neural and mechanical aspects of singing; neurophysiological interpretation of musical ability; and ecstatic and synesthetic experiences during musical perception. The second part deals with the effects of nervous disease on musical function, such as musicogenic epilepsy, the amusias, and occupational palsies. The book will be of great interest to students, researchers, and practitioners of disciplines that deal with the nervous system, such as psychology, neurology, and psychiatry.
