Torpedo 4 (VT-4) In December 1941, shortly after Pearl Harbor, the
US Navy made the decision to form a torpedo squadron from the air
group aboard the USS Ranger (CV-4). The formal commissioning

of Torpedo 4 took place on January 10, 1942, while the USS Ranger lay at anchor off Bermuda. Thus, VT-4 achieved the distinction of being the first torpedo squadron commissioned at sea.

Air Group 4 - Torpedo Squadron 4 - VT-4

Torpedo Squadron 4 consisted of 14 pilots, about 35 crewmen, but only 9 Grumman Avengers (TBFs). A tenth TBF on board was assigned to Cdr Joseph A. Ruddy, which meant that five VT-4 pilots with crews would not fly. Homer H. Hutcheson, the Exec, knew I was seasick, so he originally assigned Ensign Souza to the flight.

Official US Navy naming policy had settled on using Arabic instead of Roman numerals to designate torpedo models since the 1917 development of the Bliss-Leavitt Mark 4 torpedo.

Thomas, in the only combat account of World War II Torpedo Bomber pilot ever published, relates his 25 months of service with Torpedo Squadron 4 (VT-4) on the USS RANGER, USS BUNKER HILL, and USS ESSEX. Thomas served in both the Atlantic and

Pacific Theaters, and in some of the most important World War II battles. While on the RANGER, he participated in OPERATION LEADER, the most significant attack on Northern Europe by a US carrier during the war. During LEADER, while attacking a freight barge carrying 40 tons of ammunition, Thomas' plane was hit by anti-aircraft fire. Surprisingly, in spite of the considerable engine damage, the plane made it back to the RANGER, where Thomas crash-landed. That landing was his 13th official carrier landing. In the Pacific, Thomas participated in the numerous actions against Japanese targets in the Philippines, including strikes on Ormoc Bay, Cavite, Manilla, Santa Cruz, San Fernando, Lingayen, Mindoro, Clark Field and Aparri. Following these actions, Thomas' squadron made strikes on Formosa, French Indo-China, Saigon, Pescadores, Hainan, Amami O Shima, Iwo Jima, Okinawa, and Japan. The

attack on Japan was the first attack on Japan from an aircraft carrier since the "Doolittle Raid." While on the ESSEX, just after Thomas had returned from a strike on Santa Cruz, the ship was hit by a Kamikaze piloted by Yoshinori Yamaguchi, Yoshino Special Attack Corps. Yamaguchi was flying a Yokosuba D4Y3 dive bomber. The Kamikaze attack killed 16 crewman and wounded 44. Returning from a strike on Hainan, off the Chinese coast, Thomas' plane ran out of fuel. After a harrowing water landing, Thomas and squadron photographer Montague succeeded in inflating and launching one rubber boat and his crewman Gress another. After a long day in pre-Typhoon weather with 40 foot swells, the three were rescued by the USS SULLIVANS. In recounting the events in this book, Thomas draws upon his daily journal, his letters home, and extensive interviews and research conducted over 40 years with

fellow pilots and crewman. The book cites 20 interviews and 5 combat journals, and contains 209 photos documenting the ships, planes, men, and combat actions of Torpedo Squadron 4. Many of the photographs were collected by Thomas during the war and include gun photo shots, recon photos, and, remarkably, a picture of the tail of Thomas' Torpedo plane as it sinks in the China Sea following his water crash landing.

The final volume in the Torpedo library delivers a gut shot of killer stories to the solar plexus. Luca Torelli, AKA the Torpedo, cuts a vicious swath of mayhem and murder through the criminal underbelly of 1930s Gotham. New York in those days was crammed full of diseased rodents, both the four and two-legged variety, and Luca was the exterminator!

The torpedo was the greatest single game-changer in the history of naval warfare. For the first time it allowed a small, cheap torpedo-firing vessel—and by extension a small, minor navy—to threaten the largest and most powerful warships afloat. The traditional concept

Acces PDF Torpedo 4

of seapower, based on huge fleets of expensive capital ships, required radical rethinking because of this important naval weapon. This book is a broadranging international history of the weapon, tracing not only its origins and technical progress down to the present day, but also its massive impact on all subsequent naval wars. Torpedo contains much new technical information that has come to light over the past thirty years and covers all of the improved capabilities of the weapon. Heavily illustrated with photos and technical drawings this is a book no enthusiast or historian can afford to miss.
